

Partners Group Listed Investments SICAV - Listed Infrastructure - CHF (C - Acc.)

Monthly report as of 31 May 2019

Fund objectives

Partners Group Listed Investments SICAV - Listed Infrastructure fund provides access to the asset class infrastructure. The Fund invests in companies which make infrastructure investments and are listed on major stock exchanges. Out of an investment universe of over 280 companies worldwide, the fund management actively screens a target list of around 100 companies, which fit the minimum criteria.

Monthly comment

In May, the Partners Group Listed Investments SICAV - Listed Infrastructure remained broadly flat in a month where global equity markets lost significantly in value and hence outperformed the market. Once again, the Fund demonstrated its stable characteristics and the decision to position the portfolio more defensively, was rewarded this month. The larger market movements can primarily be explained by the escalating trade tensions between the US and China.

The best performing company in the portfolio during the reporting period was Cellnex. The Spanish tower operator announced a EUR 2.7bn deal to purchase a total of 10,700 towers in France, Italy and Switzerland. In addition, the company committed to a gradual BTS (Base Transceiver Station) roll-out plan in the same region over the next 7 years further improving their footprint across Europe. Earlier this year, we had increased the exposure to Cellnex following the company's announcement of a capital increase that improved its balance sheet and allowed for larger acquisitions.

The French airport operator Aéroports de Paris (ADP) contributed negatively to the Fund's performance. The company lost value after the French Constitutional Court allowed the proceeding of a petition that could lead to a referendum on a potential privatization. As this significantly reduced the likelihood of the privatization, the share price fell eliminating a part of the M&A premium which had been included in the share price over the past year.

Finally, the Brazilian toll road operator CCR was one of the best performing portfolio companies. After a rather ordinary performance in the first quarter of 2019, the company published very solid results with a positive EBITDA development largely driven by new projects coming into service.

Definitions

This monthly report is produced based on information available on the last working day of the month.

Infrastructure

The term 'infrastructure' comprises all durable capital goods which ensure the proper development of an economy. They comprise transportation infrastructure assets such as roads, airports, railways, harbours, tunnels and bridges. However, they also include assets of the communication infrastructure, such as TV and radio transmission systems, antennas and transmission towers for mobile phones, satellite systems and cable networks. Infrastructure also refers to utility assets in the fields of energy and water, such as energy facilities for power generation and distribution, of gas and oil exploration and distribution, as well as other water supply and distribution facilities, including desalination plants and sewage treatment facilities. Finally, infrastructure also includes the provision of services in the fields of education and health, as well as public sector building facilities (social infrastructure).

Listed infrastructure

A 'listed infrastructure' company is listed on a stock exchange and its purpose is investing in infrastructure assets.

Total return

Total return is calculated according the standard BVI-method of the Bundesverband Investment and Asset Management.
