Monthly comment

During April, the Partners Group Listed Investments SICAV – Listed Private Equity Fund outperformed both, its benchmark and the MSCI world index, driven by positive market sentiment and a good start into the Q1 earnings season. Portfolio companies that already reported results, were in line with expectations. While the performance of all sectors was positive, direct investment companies were the best performing sector.

Kinnevik, the Swedish technology focused direct investment company, was amongst the best performers in April. The company published good results for the first quarter, with NAV increasing by 5%. Both Kinnevik's private and publicly listed investment portfolio contributed equally to the positive development. The company successfully exited the virtual healthcare provider Teladoc and achieved an IRR over 55%. Management remains cautious for the full year but reaffirmed the target to invest approximately SEK 5 billion in 2023 with an equal split between new investments and follow-on investments.

EQT, one of the leading private equity managers in Europe, published good Q1 results. Investment activity remained solid across EQT's entire platform. However, management mentioned that exits were muted, and the fundraising environment continues to be challenging. Nevertheless, the company expects fundraising for the Private Equity flagship, EQT X, to be completed in the summer and to have a first close during Q2 for the infrastructure flagship fund. All strategies continue to perform on or above plan with valuations flat or slightly up in Q1. Additionally, the fund valuations remained resilient, underpinned by continued strong performance of the portfolio companies, as well as supportive public market valuations.

Finally, Ares, the US alternative asset manager, reported solid Q1 results and benefitted from its focus on private debt with mainly floating interest rates. Despite a challenging fundraising environment, the company continues to see robust investor demand, to a large extent for debt strategies. Fee-related earnings increased by 24% and exceeding the growth in asset under management of 11% year-to-date. Management remains constructive, reaffirmed the growth targets and highlighted a pickup in the deal pipelines for more opportunistic strategies.
