

Partners Group Listed Investments SICAV - Listed Private Equity - GBP (I - Dist.)

Monthly report as of 29 February 2016

Fund objectives

The Partners Group Listed Investments SICAV – Listed Private Equity fund provides efficient access to the asset class private equity overcoming the normally associated hurdle of illiquidity. The Fund invests in companies which mainly focus on private equity investments and are listed on major stock exchanges. Out of an investment universe of over 200 companies world wide, the Fund actively screens a target list of around 100 companies, which fit the minimum criteria.

Monthly comment

In a market environment characterized by high volatility, Partners Group Listed Investments SICAV – Listed Private Equity achieved a stable performance.

Among the strongest assets were alternative asset managers. Apollo Global Management satisfied its investors with the announcement of a share buyback program of USD 250 million, equal to 8.8% of the company's free-float. Furthermore, Apollo Global Management was able to successfully pursue new investments like ADT, a home security service provider which has been acquired for USD 15 billion, accounting for the largest buyout in 2016 so far. The co-investment in Apollo Education Group has been positively perceived by the market as well. Apollo Global Management's share price increased in February by 13%. Another successful alternative asset manager in February was Carlyle Group. The company rolled out new products, confirmed its fundraising target of USD 15 billion and as a result was upgraded by several brokers.

Compared to the previous year, South African private equity company Brait was able to increase its NAV per share by 120% at the end of 2015. However, the weak outlook for the South African private equity market had a negative impact on the company's development. Among others, the deal values in South Africa dropped to the lowest level in the last three years. However, Brait announced its plans to sell smaller investments over the next two years.

On the other side, the US business development company Solar Capital profited from the publication of strong annual results. The company's portfolio has no direct exposure to the oil & gas sector and was able to deploy USD 163 million after valuations have become more attractive due to its strong net cash position.
