## Monthly comment

In January, Partners Group Listed Investments SICAV – Listed Private Equity continued its positive trend and increased in value. This development was supported by the proposal of a USD 1.9trn fiscal stimulus package in the US. However, during the second half of the month, markets gave up a part of their gains as further lock-down measures were put in place and the vaccination roll-out progressed slower than expected. Most of the sectors in the portfolio contributed positively, with alternative asset managers being the best performers.

EQT, the Swedish alternative asset manager, performed best. The company reported annual results above expectations. Fund raising was very strong and driven by its two flagship funds EQT IX and EQT Infrastructure V, increasing AUM by 46% compared to the previous year. In addition, new investment activity was very high at EUR 12.9bn and the newly raised funds already reached investments levels of 32% and 25%, respectively. Lastly, the manager improved its profitability and increased the EBITDA margin to 48% from 35%.

In contrast, the Canadian direct investment company Onex, with a focus on private equity and debt, developed negatively in January. The performance was mainly impacted by the companies' exposure to cyclical and travel-related industries, which suffered as the Canadian Government imposed new restrictions.

Another top performer was Prosus, a direct investment company focusing on online marketplaces, payments & fintech, and food delivery industries. The underlying portfolio companies have performed well during the first wave of lockdowns and are expected to benefit from the new lockdown restrictions. In addition, the company is buying back shares.
