## Monthly comment

Partners Group Listed Investments SICAV – Multi Asset Income recorded a gain in value in May and developed more favorable than the broad equity market. Especially real estate operators and alternative asset managers contributed positively to the fund's performance during the reporting period.

For example, CBL & Associates Properties, a US-based real estate operator, achieved an increase in share price after the release of its positive quarterly results. Additionally, the dividend increased significantly compared to the previous year.

One of the top performers during the month was the US railway operator Union Pacific. The company reported a volume growth of 2% for the past quarter compared to Q1 2017. Furthermore, the company made progress in reducing its operating ratio. The growing freight volumes in the railroad sector were also one of the reasons for the positive performance of Canadian National. Overall, the railroad sector benefited from the positive economic momentum and better prospects of raising prices above cost inflation, due to shortage of truck capacity.

Another highlight was the development of the BDC Oaktree Specialty Lending Corp. The company released its quarterly report and convinced its investors with the progress of the repositioning of the portfolio. The investment vehicle also reported a NAV-growth and increased its dividend by 12% over the reporting period.
