Monthly comment

Partners Group Listed Investments SICAV – Multi Asset Income started the new year with a wide performance divergence over the portfolio companies. Corporations in the energy transmission and distribution sectors as well as real estate operators performed negatively in January, whereas alternative asset managers based in the US had a positive start to the year. The market is expecting the US tax reform to positively influence the asset management sector.

The asset manager with the highest performance over the reporting period was Ares Management. The company profited from its relatively favorable valuation compared to similar asset managers and increased in value by 16.8% in January.

In contrast, the British real estate operator New River declined in value. The slowly progressing Brexit negotiations and a challenging retail business in the UK had a negative impact on the company, even though they published favorable financial figures in January.

On a positive note, the Swiss-based investment company, HBM Healthcare also developed positively after selling one of their portfolio companies, Advanced Accelerator Applications at the highest profit in the history of HBM. In addition, HBM's other investments also reported favorable financial figures and the management is optimistic to receive further drug approvals from the FDA, the health authority in the US.
