

Partners Group Listed Investments SICAV - Multi Asset Income GBP (I - Dist.)

Monthly report as of 30 September 2018

Fund objectives

Partners Group Listed Investments SICAV – Multi Asset Income is an open-end investment fund incorporated in Luxembourg. The Fund's objective is to invest in infrastructure, real estate and private debt companies with an attractive, sustainable dividend yield and inflation-linked cash-flows. The focus is on securities which offer an above-average dividend yield as well as long-term capital growth.

Monthly comment

In September, Partners Group Listed Investments SICAV – Multi Asset Income posted a downward performance in a generally unfavorable month for the global equity markets. However, the negative development over the month was cushioned by US alternative asset managers and business development companies.

For example, the US alternative asset manager Ares Management performed particularly well in the reporting period. The market reacted positively to the announcement that the largest shareholder up to this point, Abu Dhabi Investment Authority, had completed the sale of its entire stake. Also, the US alternative asset manager Blackstone convinced investors in September as well. The management confirmed at its investor day the outlook to increase its assets under management from USD 439 billion to USD 1 trillion over the next eight years.

At the end of September, a consortium led by Australian toll road operator Transurban acquired a majority stake in WestConnex, a large expressway in Sydney. In order to fund this project, the company completed a AUD 4.2 billion rights issuance at a discount of more than 10% to the previous close, which resulted in a significant drop of its share price.

On the positive side, the largest US railway company, Union Pacific, was particularly convincing. After unveiling the "Unified Plan 2020", which aims to improve railway productivity and introduces the associated pilot program PRS (Precision Railroad Scheduling), the company intends to streamline its processes and thus achieve savings in operating costs. In the past, CSX Transportation, a US railway company, has introduced such a program, which has led to an increase in operational efficiency letting investors anticipate similar efficiency gains.
