## Monthly comment

In February, Partners Group Listed Investments SICAV – Multi Asset Income continued to perform well. Overall, more than 80% of the underlying shares generated a positive return in the reporting period.

One of the best performing portfolio companies during the reporting period was the French toll road operator Vinci. The company impressed with financial results that exceeded investors' expectations. In particular, the company benefited from the financial income from toll roads and the steadily growing airport business. Additionally, Vinci continued to preserve healthy liquidity levels, which can be deployed for future business opportunities.

Unibail contributed negatively to the Fund's performance last month. Despite an impressive financial performance from European shopping centers and solid fundamentals, investors reacted rather negatively due to a weakening US business and realized gains after the share price rally in January.

Finally, the Canadian private equity company Onex continued to grow in February after having published strong financial results in the previous month. The increase in February is partly due to the assumption that Onex is about to exit Advanced Integration Technology, which could fetch more than USD 1.5 billion.
