Monthly comment

In August, the Partners Group Listed Investments SICAV - Multi Asset Income increased in value, however behind the global equity markets. Many global indices have almost fully recovered the losses from the sell-off earlier in the year and recorded all-time highs. The Fund's positive August performance was primarily driven by its allocation to private equity, which benefited from healthy Q2 earnings as well as positive news flow on bolt-on investments and value uplifts. Meanwhile, infrastructure stocks were weak, negatively affected by utilities, though partially offset by toll roads and airports.

Among the top performers this month was HgCapital. The company further invested in its portfolio companies, with a strong uplift in carrying values. For example, HgCapital increased the stake in Visma, its main portfolio holding by GBP 17.1 million, bringing its existing investments to GBP 268.8 million. The transaction implies a 35% uplift over the carrying value. Furthermore, GBP 8.1 million was added to Evaluate, an analytics firm, which results in a 40% uplift in value compared to its latest valuation.

In contrast, the regulated transmission & distribution companies, as well as the water sector, lagged as investors seemed to have shifted towards more cyclical stocks, due to the strong interest in more growth-oriented companies as well as the overall desire to add more risk to the portfolios.

Finally, the business development company Oaktree delivered a strong quarter through active origination and a rebound in its portfolio, which resulted in a 14% rebound in NAV quarter over quarter. The Company further increased RCF commitments, while its portfolio saw broad improvement in credit quality with only a few markdowns within legacy, energy, and consumer related names.
